The Scheme can invest in any other permitted overseas securities / instruments that may be available from time to time. Investment in Foreign Securities shall be in accordance with the guidelines issued by SEBI from time to time.

The above-mentioned securities could be listed, unlisted, secured, unsecured, rated or unrated and may be acquired through initial public offerings, secondary market offerings, private placements, rights offers etc. To avoid duplication of portfolios and to reduce expenses, the Scheme may invest in any other schemes of the Fund to the extent permitted by the Regulations. In such an event, the AMC will not charge management fees on the amounts of the Schemes so invested, unless permitted by the Regulations.

While it is the intention of the Scheme to maintain the maximum exposure guidelines provided in the table above, there may be instances when these percentages may be exceeded. Typically, this may occur while the Scheme is new and the corpus is small thereby causing diversification issues.

- Investments may be in listed or unlisted debt instruments, as permitted under SEBI Regulations. These would cover secondary market purchases, Initial Public Offers (IPOs), other public offers, placements, rights offers, etc., subject to SEBI Regulations.
- Investments in debentures, bonds and other fixed income securities will usually be in instruments, which have been assigned investment grade ratings by an approved rating agency. The instruments may be rated / unrated and listed / unlisted. In cases where the debt instrument is unrated, specific approval from the Investment Committee of RCAM shall be obtained.

The Scheme will comply with the relevant investment restrictions mentioned in Schedule VII of SEBI (Mutual Funds) Regulations, 1996.

The final portfolio will depend on the availability and desirability of assets in terms of maturity profile, asset quality and yields. The portfolio formulation is a dynamic process and thus, an instrument which is attractive today may not be attractive tomorrow.

(i) CREDIT EVALUATION POLICY FOR INVESTMENTS IN DEBT SECURITIES

Credit evaluation is a continuous process. It applies not only for issuers where investments are being evaluated for the first time but also for those where we already have credit exposures.

In a detailed credit evaluation process, the following aspects are covered.

- An in-depth review of the sector in which company operates. In this process, research team also measures the micro and macro risks associated with the sector and its possible impact on the overall business environment of the issuer. In addition, issuer's market position is evaluated vis-à-vis competition.

- Issuer analysis involves both qualitative and quantitative aspects.
 - Qualitative analysis is related to quality of management, corporate governance, promoter background, parents support etc. Any synergy / cross dependence with any of the other promoter companies is also scrutinized.
 - Quantitative analysis is related with balance sheet management, profitability indicators, ratio analysis, capex programmes, growth plans, leverage and cash management policy etc.
- The due diligence process involves both primary and secondary sources for research.
 - Secondary sources of information like publicly available data including annual reports and other public filings, rating and other research reports, industry research reports are studied in detail.
 - Primary research activities like direct interaction with the issuer at various levels, interaction with the rating agencies, the company's bankers, competitors in the industry and stock market participants (market intelligence), is given a very high weightage.
- Both for plain vanilla transactions and especially for structured transactions, legal due diligence is an integral part of the overall risk evaluation policy. Depending on the scope and complexity of transactions both internal as well as external legal exercises are undertaken.

Based on the above analysis, the credit research team presents a case for investing / avoiding investments for any new issuer / structure. Post these discussions formal proposals are prepared for issuers / structures where limits are being sought.

The approval for such limits is sought, based on certain criterion that is laid out as part of the investment policy. Depending on the rating, tenor, and proposed exposures, approvals are taken at the Head of Fixed Income / Investment Committee / Board levels.

As mentioned earlier, credit evaluation is a continuous exercise. For all issuers / structures where we have current exposures regular evaluation is carried out on a periodic basis. The periodicity of such evaluation depends on the exposure, credit comfort on the said issuer / structure and the overall credit environment.

Apart from regular credit updates both internally and at the Investment Committee levels, the board is also appraised on a periodic basis, on all the credit exposures, their performance and the credit department's views on them going forward.

(ii) LIST OF SECTORS WHERE RCAM / RMF WOULD NOT BE INVESTING

Debt securities investments will not be made in real estate sector.

(iii) TYPE OF INSTRUMENTS IN WHICH THE SCHEMES PROPOSE TO INVEST

For the type of instruments in which the schemes propose to invest is detailed in point no. D (where will the scheme invest - Point No. 1 to 9)

(iv) INTENDED PORTFOLIO ALLOCATION

As per SEBI Circular No IMD/ DF/12 /2011 dated August 1, 2011 on Indicative portfolio or yield in close ended debt oriented mutual fund Scheme, the intended allocation for Reliance Dual Advantage Fixed Tenure Fund II - Plan A is as mentioned below. The floors and ceilings as disclosed below are within a range of 5% of the intended allocation (In %)

(The intended portfolio would be applicable only to the fixed income portfolio)

Instruments	Credit Rating	% of Net Assets (of the scheme corpus)
CDs		
CPs	-	-
NCDs	AA/A1+	75% - 80%
Any other securities including money market instruments, Government Securities issued by Central &/or State Govt & other fixed income/ debt securities including but not limited to Corporate bonds	-	0-5%

Note: Short Term highest rated instruments will be categorized as AAA. The scheme shall not make any investments in derivatives.

In addition to above, the % age asset allocation as mentioned in the Key Information Memorandum (KIM) for Equities & Equity related Instruments# (including options premium)*, if not deployed in Equities & Equity related Instruments# (including options premium)* would be deployed in cash and cash equivalents such as CBLO, Repo (excluding Repo in corporate debt securities), T-Bills, CDs of highest rating (A1+ or equivalents) and FDs of less than 15 days maturity. In case, if there is any deviation in the actual asset allocation pattern of Equities & Equity related Instruments# (including options premium)* (i.e. 5% - 20%), RCAM will endeavour to rebalance the portfolio in tune with the asset allocation pattern mentioned in this KIM within a time period of not more than 30 days provided such a rebalancing is in the best interest of the investors.

There shall be no variations between intended portfolio allocation as may be issued at the time of launch and final portfolio except on account of

- deployment of funds towards higher rated instruments / securities within the same investments category.
- non-availability of papers or due to the risk reward analysis, investments have not been made in instruments like NCD then in such cases investments will be made in CDs of highest rating (A1+ or equivalents) / T- Bill/CBLO/ Repo(excluding Repo in corporate debt securities).
- maturity of individual securities happening prior to the maturity of the scheme or at the time of construction of the portfolio In such times, investments may be made in cash and cash equivalents such as CBLO, Repo (excluding Repo in corporate debt securities), T-Bills, CDs of highest rating (A1+ or equivalents) and FDs of less than 15 days maturity.
- external factors such as revision in credit rating of instruments, valuation of security, etc. It may be noted that
 - all the investments rating etc will be considered at the time of making the investments only i.e at the time of deployment (for the purpose of comparison).
 - positive movement of rating for a particular instrument will be continued to be allowed in the interest of the investor. However, in case of downgrades of a particular instrument, the portfolio manager shall endeavor to rebalance the portfolio on a best effort basis within a time period of not more than 30 days provided such a rebalancing is in the best interest of the investors.
- tactical allocation to cash and cash-equivalents in lieu of any other indicated

class of instruments. Such short-term allocation to cash equivalents such as CBLO, Repo(excluding Repo in corporate debt securities), T-Bills, CDs of highest rating (A1+ or equivalents) and FDs of less than 15 days maturity shall not be viewed as a violation of the indicated portfolio. However RCAM will ensure that such cash / cash equivalents are duly deployed back into the indicated portfolio / security within a time frame of around 15 days except for securities nearing maturity of the scheme.

6. In cases where instruments are rated by two or more credit rating agencies, the most conservative rating amongst them would be considered.
7. As per SEBI circular CIR/MIRSD/4/2011 dated June 15, 2011, Modifier "+"(plus) or "-"(minus) can be used with the rating symbols as they reflect the comparative standing within the category. For eg: in case AA has been mentioned, it will include AA- as well as AA+.

It may be noted that the intended portfolio allocation will be determined at the time of launch of the scheme whereas the final portfolio for the purpose of determining deviations, if any, will be considered after 15 days from the allotment of the scheme. Basis the same, RCAM will report in the next meeting of Board of Directors of RCAM and Reliance Capital Trustee Company the publicized percentage allocation and final portfolio.

For unlisted / non traded securities, where sector classification does not exist, RCAM will have the discretion to decide the classification as per their best judgment.

WHAT ARE THE INVESTMENT STRATEGIES?

The fund management team will endeavor to maintain a consistent performance in the scheme by maintaining a balance between safety, liquidity and profitability aspects of various investments. The fund manager will try to achieve an optimal risk return balance for management of the fixed income portfolios.

The investments in debt instruments carry various risks like interest rate risk, liquidity risk, default risk, purchasing power risk etc. While they cannot be done away with, they can be minimized by diversification and effective use of hedging techniques.

The fund management team will take an active view of the interest rate movement by keeping a close watch on various parameters of the Indian economy, as well as developments in global markets.

Investment views / decisions will be taken on the basis of the following parameters:

1. Prevailing interest rate scenario
2. Quality of the security / instrument (including the financial health of the issuer)
3. Maturity profile of the instrument
4. Liquidity of the security
5. Growth prospects of the company / industry
6. Any other factors in the opinion of the fund management team

The equity portion of the scheme will invest in diversified portfolio of Equities & Equity Related Instruments# (including options premium)* across market capitalisation.

The funds will follow a bottom-up approach to stock-picking and choose companies across sectors. The Schemes will primarily focus on companies that have demonstrated characteristics such as market leadership, strong financials and quality management, and have the potential to create wealth for their shareholders by delivering steady performance through the ups and downs of the market. The Fund also expects to achieve the market linked appreciation (upside) by investing in premium of exchange traded options.

Risk Mitigation Factors /Risk Control - The Fund Management proposes to use analytic risk management tools like VAR / convexity/ modified duration for effective portfolio management.

RISK PROFILE OF THE SCHEME:

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

(i) Schemes investing in Bonds:

Interest Rate Risk: As with all debt securities, changes in interest rates will affect the Scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise.

Liquidity or Marketability Risk: This refers to the ease at which a security can be sold at or near its true value.

Credit Risk: Credit risk or default risk refers to the risk which may arise due to default on the part of the issuer of the fixed income security (i.e. will be unable to make timely principal and interest payments on the security).

Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme or from maturities in the Scheme are reinvested.

(ii) Risks associated with investing in Equities

Equity and Equity related instruments on account of its volatile nature are subject to price fluctuations on daily basis. This may have adverse impact on individual securities /sector and consequently on the NAV of Scheme.

The inability of the Scheme to make intended securities purchases and the inability to sell securities held in the schemes portfolio may result, at times, in potential losses to the scheme. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments. The AMC may invest in unlisted securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio as these unlisted securities are inherently illiquid in nature and carry larger liquidity risk as compared to the listed securities or those that offer other exit options to the investors.

(iii)Risks associated with investing in foreign Securities

The Fund may invest in overseas equities / ADR's / GDR's with the approval of RBI/SEBI. subject to such guidelines as may be issued by RBI/SEBI. The net assets, distributions and income of the scheme may be affected adversely by fluctuations in the value of certain foreign currencies relative to the Indian Rupee to the extent of investments in these securities. Repatriation of such investment may also be affected by changes in the regulatory and political environments. The scheme's NAV may also be affected by a fluctuation in the general and specific level of interest rates internationally, or the change in the credit profiles of the issuers.

(iv) Risk associated with Short Selling & Securities Lending

In case the Scheme undertakes stock lending under the Regulations, it may, at times be exposed to counter party risk and other risks associated with the securities lending. Short positions carry the risk of losing money and these losses may grow theoretically unlimited if the price increases without limit and shall result into major losses in the portfolio.

(v) Risks associated with Investing in Derivatives

- Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is a possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counterparty") to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

(vi) Other Scheme Specific Risk factors

The liquidity of the Scheme's investments may be inherently restricted by trading volumes, settlement periods and transfer procedures. In the event of an inordinately large number of redemption requests, or of a re-structuring of the Scheme's investment portfolio, these periods may become significant. Please read the Sections of this Scheme Information Document entitled "Special Considerations" and "Right to Limit Redemptions" thereunder.

(vii) Risks associated with Listing of Units

Listing of the units of the fund does not necessarily guarantee their liquidity and there can be no assurance that an active secondary market for the units will develop or be maintained. Consequently, the Fund may quote below its face value / NAV.

There have been times in the past, when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct further transactions. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are not invested and no return is earned thereon.

The liquidity and valuation of the Scheme's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to their target date of divestment
